The project is identified as State Project No. 0024-0091.

The purpose of the project is to replace the existing structure due to its scour critical rating. The proposed replacement is a 104 foot clear span steel truss finished in a natural color.

There are right-of-way impacts associated with the proposed improvements. Temporary relocation of overhead utilities for work clear zones and minor property takings for the wingwalls are anticipated.

Construction is anticipated to begin in spring 2023 based on the availability of funding, acquisition of rights of way and approval of permit(s). The estimated construction cost for this project is approximately \$ 3.86 million. This project is anticipated to be undertaken with 80 percent Federal Funds and 20 percent Local funds.
